

CONTENTS

Advanced manufacturing of advanced materials from macro- to nanoscale under static to shock loading: Principles and sustainable industrial applications <i>ATHANASIOS G. MAMALIS</i>	183
Influence of the size, shape and concentration of magnetic particles on the optical properties of nano nickel films <i>LALI KALANDADZE, OMAR NAKASHIDZE, NUGZAR GOMIDZE AND IZOLDA JABNIDZE</i>	197
Why the most risk-averse take the biggest risks: a quantitative reanalysis of Atkinson’s and Litwin’s “hoop-the-peg” experiments. Part 1: Simulation and model validation <i>PHILIP THOMAS</i>	204
Why the most risk-averse take the biggest risks: a quantitative reanalysis of Atkinson’s and Litwin’s “hoop-the-peg” experiments. Part 2: Establishing the raw data <i>PHILIP THOMAS</i>	229
High-energy thermal study of the high-entropy silver–copper alloy system using the PBIN database and Thermo-Calc software package <i>W.U. SHAH, D.F. KHAN, J.S. SHAH, H.Q. YIN AND A.G. MAMALIS</i>	251
